

Description and application

Grilles intake and exhaust has movable blades embedded in the front frame in a double row in horizontal and vertical system and damper directly behind the grille louver. For use in installation low and medium pressure. Adjusting the angle is manual and the individual for each blade.

Grille has Hygienic Certificate HK/K/0522/01/2016

Material and workmanship

The grille is all made of galvanized steel sheet powder coated white RAL 9016. On request it is possible to paint in a different color from the RAL palette and made on special stainless steel or aluminum. The damper is made of galvanized steel (on request can be also painted in any RAL color).

Size

Grilles are manufactured to order. Grilles dimension by the customer request.

L - width of the mounting hole

H - height of the mounting hole

Methods of mounting

Assembling visible through screws and mounting holes in the grille frame.

Assembling invisible by latches in grille and mounting frame RM or in plenum box.

Assembling invisible by screws and lock assembly in mounting frame RM or in plenum box

Accessories- plenum box

Plenum box is made of galvanized steel. On request it can be equipped with a damper control onto the connected spigot. The plenum box is isolated inside with rubber (acoustic) or outside with mineral wool (thermal). In the standard height of the plenum box is adapted to size of the spigot or diffuser size (you can specify the height of the plenum box).

SR-Gw - plenum box with the spigot on the top

SR-Bw - plenum box with the spigot on the side

SR-Tw - plenum box with the spigot on the back

Accessories - RM frame for invisible installation

RM frame used in the ventilation holes for invisible mounting ventilation components. Mounting frame for grilles in standard are made of galvanized steel (in the case of aluminum grilles on request frame can be also aluminum). There is possibility to make mounting frame with a filter.

Accessories- dampers

Grille ST-W/S/G can also be equipped with a damper, positioned directly behind the grille blades. In this type of grill, damper regulation is possible from the front side of grille, without the need for disassembly, by deviation grille blades. Below there are the types of dampers used for the ventilation grilles.

GS - slot damper
(above the size of 525x425 the damper must be divided)

GP - damper with counter running blades
(above the size of 525x425 the damper must be divided)

GU - cantilevered damper
(especially recommended for grilles to spiro channel)

The method of placing an order

Please make orders according to the following formula:

ST-W/S/ 'G' / 'LxH' / 'RAL' / 'M' / 'W' + 'SR' / 'I' / 'P' / 'K' / 'H'

'G'	- adjustment by damper GP - regulation by damper with counter running blades behind grille GS - slot damper GU - cantilevered damper
'LxH'	- mounting hole size (width x height) in mm
'RAL'	- grille color according to RAL palette (standard RAL9016*)
'M'	- material: ST - powder coated steel* AL - aluminum powder coated KO - stainless steel / acid proof steel (type 1.4301 or 1.4404)
'W'	- mounting option: W1 - visible assembly through screws in holes in grille front frame* W2 - invisible mounting using latch springs and additional mounting frame W3 - invisible assembly using screws, and an additional mounting frame
'SR'	- plenum box: SR-Gw - plenum box with top spigot connection SR-Bw - plenum box with side spigot connection SR-Tw - plenum box with back spigot connection
'I'	- isolation: none - plenum box without isolation* Iz - outside isolation (thermal) Iw - inside isolation (acoustic)
'P'	- adjustment damper at spigot connection: none - no damper* P - damper on spigot connection adjustable from the outside PP - damper on spigot connection adjustable from the inside
'K'	- diameter spigot connection in size mm
'H'	- the height of the plenum box in mm*

* - If you don't give the information will be used standard parameters.
